"Caching" is a service

"that consists of the transmission in a communication network of information provided by a recipient of the service, involving the automatic, intermediate and temporary storage of that information, performed for the sole purpose of making more efficient the information's onward transmission to other recipients upon their request;"

(Art. 3 (f) (ii) DSA)

The following tiles represent the regulations for information society services that offer "caching":

- Liability
- Order against illegal content
- Order to provide information
- Points of contact and legal representatives
- General Terms and Conditions
- Transparency report
