Art. 20 lit. a Directive 2019/944 for the internal market for electricity:

"the smart metering systems shall accurately measure actual electricity consumption and shall be capable of providing to final customers information on actual time of use. **Validated historical consumption data** shall be made easily and securely available and visualised to final customers on request and at no additional cost. **Non-validated near real-time consumption data** shall also be made easily and securely available to final customers at no additional cost, through a standardised interface or through remote access, in order to support automated energy efficiency programmes, demand response and other services;"
